Training

Our Categories

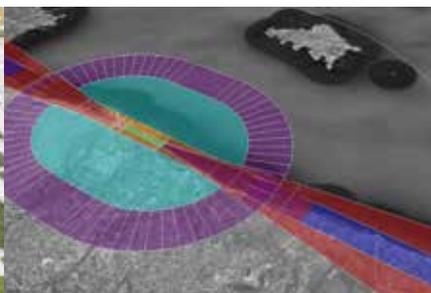

The aviation industry is constantly changing, making it hard for airport professionals to stay on top of all new rules and regulations. airsight has been in the business for 20 years, offering a variety of practical training sessions which provide airports, air navigation service providers as well as civil aviation authorities and organisations with the most up-to-date contents.

Ranging from airport planning and certification topics to flight procedure design and air traffic management, our course schedule offers training sessions from a broad range of airport related categories, giving deep insights into the matter thanks to our renowned trainers who are experts in their field.

Airport Planning

Airport & Aviation Safety

Airport Operations

Airport Certification

Airport Capacity

Air Traffic Management

Training

Course Benefits

The latest industry trends and developments: Aviation regulations are always changing. By attending our courses, you will stay up to date on changes affecting our industry.

Compliant with EASA requirements: Participants receive an airside Certificate, which is well recognised in the industry due to our compliance with EASA requirements and our high reputation.

High practical relevance with real-world examples: All our course content is based on our worldwide project experience and internationally recognised best-practices.

Individual and effective knowledge transfer: Our courses leave enough time for individual questions and professional exchange and can be adapted to the requirements and knowledge of the participants.

Great training locations in the centre of vibrant cities: As part of our premium service, we hand-pick our locations: Established and easily accessible hotels will make your learning experience very enjoyable.

Networking within the aviation industry: Our trainings are mainly attended by international experts offering the opportunity for professional exchange and networking.

The positive feedback provided by the participants of our courses validates the high quality standards we are providing in our trainings. 96% of the previous attendees would recommend airisight training courses to their colleagues within the industry!

Silke Corleisen, Head of Training

In-house Courses: Tailored to your Needs

Need to train a group at your own premises? We can come to you, with training options tailored to your needs and requirements.

In-house courses are a cost-effective way to give your staff the specific training they need, delivered by our renowned trainers. airisight's customers especially appreciate that they can freely choose the training venue and dates, the number of participants and the course content out of airisight's broad portfolio.

airisight has conducted over 200 customised In-house trainings with more than 2000 participants since 2010 in many different countries worldwide! Feel free to contact us for more information on our website, by phone or mail.

Training

Training

Selected Clients

Excellent content and very well delivered. Audience included people with varied levels of knowledge but all were kept very engaged throughout. Really good course delivered by an excellent trainer.

I really appreciated the course and I will most certainly use much of the information! The practical examples were very helpful and the trainer had extensive experience worldwide.
